

Cart

The user should be able to see the list of products they have added to their cart with the following information:

- The list of products added to the cart
- Quantity (user should be able to change the quantity)
- Total price of each product
- “Delete” button to delete the products from the cart

Order split

The user should be able to create a sub-cart inside their main cart.

The sub-cart must contain the following information:

- Project name (user can choose or add a new project name)
- The list of products added to the cart
- Quantity (user should be able to change the quantity)
- Total price of each product
- “Delete” button to delete the products from the cart

The user could create from 1 to 10 sub-carts inside one order.

Projects

The user should be able to view the history of their orders, which includes detailed information based on the project names from sub-carts.

The user should be able to export report (as .csv or .xlsx file) about their orders.

Checkout

During the checkout phase, the user should be able to choose:

- Payment method
- Shipping / pick up options
- The address of the delivery or the nearest store location
- The preferred shipping time

Additionally the user should be able to add new payment method or delivery address.

During the checkout phase, the user should be able to choose different payment methods for sub-carts.

Promo-codes

During the checkout phase, the user should be able to enter a promo code.
